Dellonda Trampoline Anchor Kit 4pc Ground Pegs Universal Fitting

Model No. DL70

Thank you for purchasing a Dellonda product. Manufactured to a high standard, this product will, if used according to these instructions, and properly maintained, give you years of trouble free performance.

Important Information

Please read these instructions carefully. Note the safe operational requirements, warnings & cautions. Use the product correctly and with care for the purpose for which it is intended. Failure to do so may cause damage and/or personal injury and will invalidate the warranty. Keep these instructions safe for future use.

Refer to instruction manual

Wear protective gloves

About the Product

Set of 4 trampoline ground anchors suitable for use with 6ft, 8ft, 10ft, 12ft & 14ft trampolines. Prevents trampoline from moving during use and strong winds. Kit include 4 spiral steel pegs and 4 adjustable safety straps.

Safety Instructions

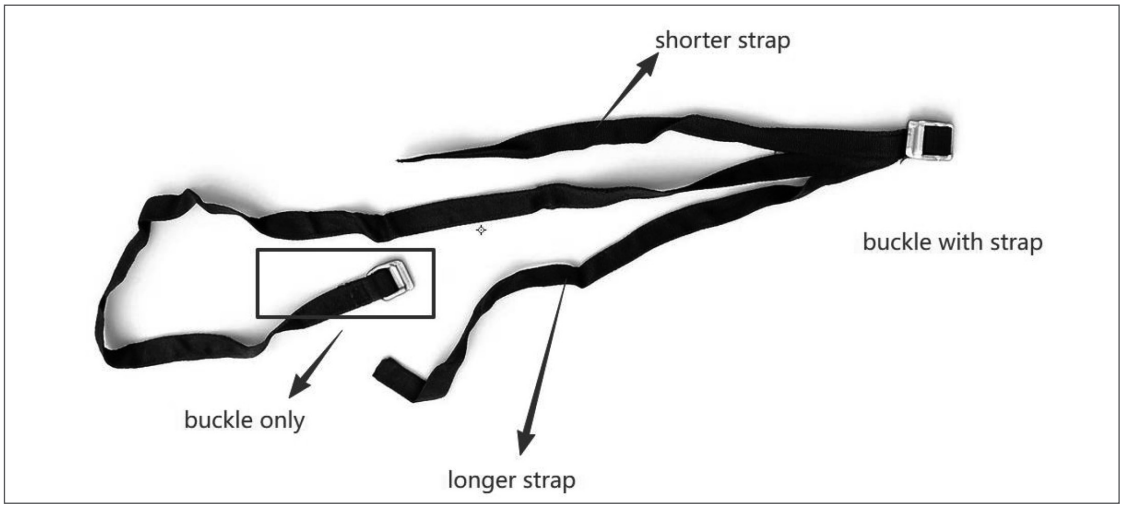

- Always read these instructions fully before assembling and using your trampoline.
- **WARNING!** Only for domestic use.
- **WARNING!** Outdoor trampolines should be equipped with a ground fixing kit or method of securing it so that it will not affected by strong winds or adverse weather conditions.
- Trampolines should be assembled by a competent adult in accordance with the assembly instructions and checked thoroughly before being used for the first time.
- The anchor should be routinely checked by a responsible person to ensure it is in serviceable condition at all times.
- **WARNING!** If this product becomes worn or damaged in anyway you must immediately stop using it until any areas of concern are repaired or replaced to a serviceable standard by a competent person.
- **WARNING!** Always stop jumping **before** exiting the trampoline. Always exit the trampoline using the net door opening only.
- **DO NOT** position the trampoline on concrete, stone or any paved hard surface.
- The trampoline should be located over grass or **BSI** approved matting, 2m away from any garden structure or obstruction such as a fence, garage, overhanging branches, laundry lines and electric lines.
- **DO NOT** position the trampoline within 2m of anything else such as paddling pools, swings, slides and climbing frames.
- Any modifications or changes to this unit (e.g. the adding of an accessory) shall be carried out to the instructions of the manufacturer.
- **WARNING! DO NOT** use in strong wind conditions and secure the trampoline**.**

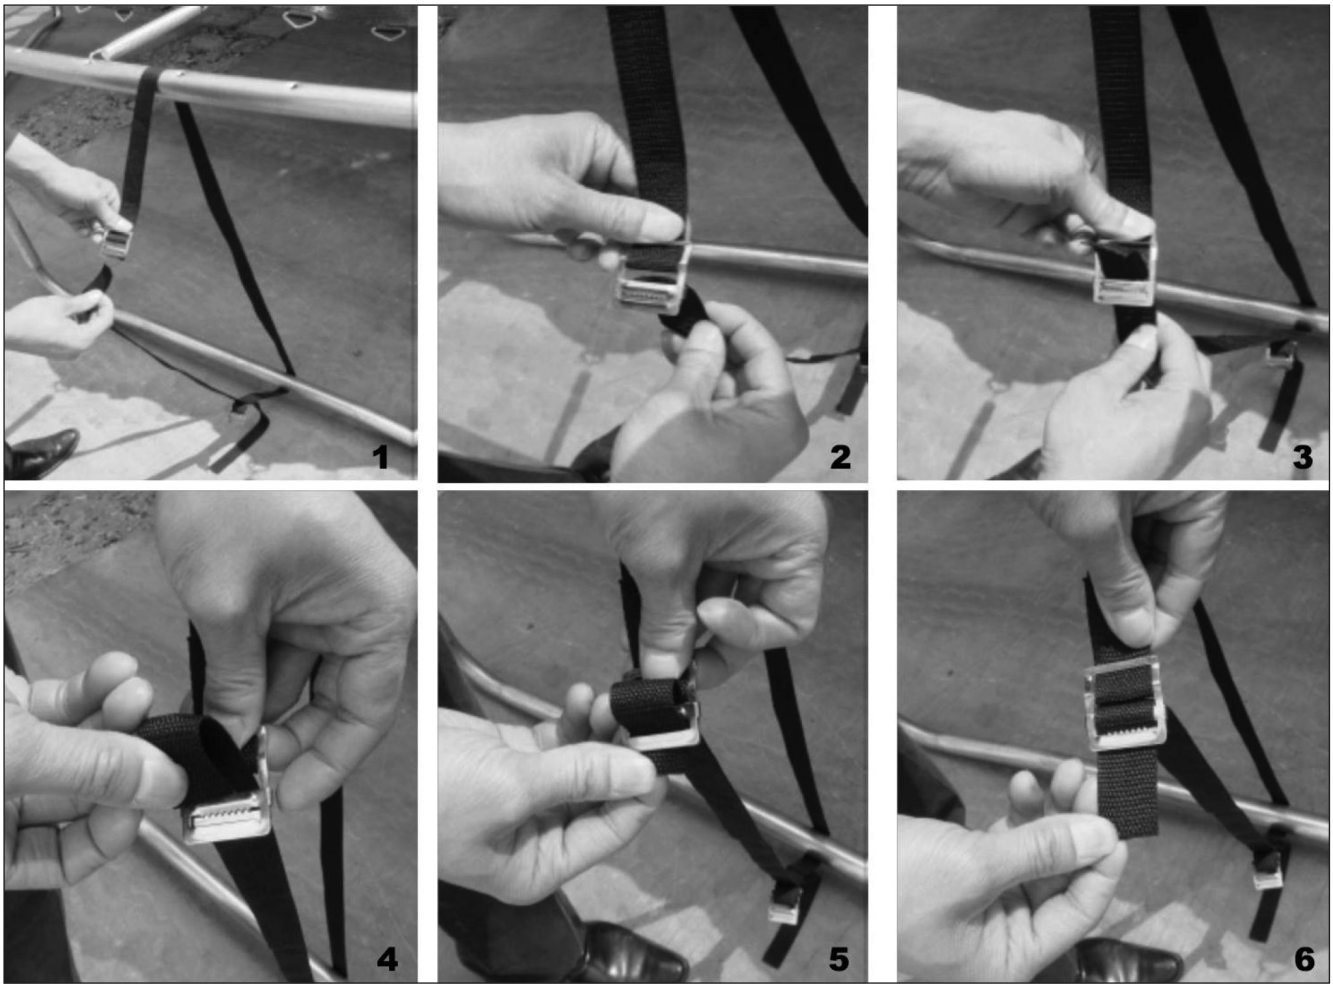

Daily checks required before using

- Inspect straps and ground anchor pegs to ensure they not damaged or loose.
- Inspect the safety straps for any tears, damage and wear.
- **WARNING!** If the anchor kit fails any of the inspection or safety notes before use, **DO NOT USE**! You are at risk of serious injury or death.

Installation of straps

- The anchor straps are used to assist in preventing the trampoline blowing away in high winds. When choosing a site for the trampoline, care should be taken that it is in an area where there as much shelter as possible.
- **STEP 1: SECURE THE FRAME TUBE AND LEG TUBE**
- The separate buckle (buckle only) is used with the longer strap. Route this strap over the top frame rail and bottom leg tube of the trampoline, install following the steps shown in the image and pull the strap tight to secure it.

- **STEP 2: SECURE THE ANCHOR**
- For each anchor you will need to screw the anchor into the ground directly below the frame where you wish to secure the strap. The anchor needs to be turned clockwise and it will bury itself into the ground.
- Continue until only the top ring of the anchor is showing. If you have particularly hard soil you may wish to use a peg through the top ring to gain some leverage which will assist in screwing the anchor all the way in.
- Thread the short webbing strap through the loop of the ground anchor, attach it to the buckle using the same installation method as Step 1, then pull tight to prevent slack.

This picture is for reference only, to show strap buckled through anchor ring.
Anchor should be wound into the ground so only the ring is visible.

- This Anchor Kit is only meant to assist in keeping your trampoline secure in low to moderate winds.
- If the soil under your trampoline is of insufficient consistency, or if you live in an area which experiences high winds and/or high wind gusts, an anchor kit may not provide sufficient protection.
- In these cases, we recommends that you disassemble your trampoline and safely store it during severe weather.
- This product must be installed by Adults ONLY.

Maintenance

- Regularly check all components, if the straps are loose tighten immediately, if the anchor pegs become loose they must be reinstalled straight away.
- Check the canvas straps and buckles for wear or degradation if these become worn or damaged in any way they must be replaced immediately.
- Excessive exposure to snow, rain and low temperatures can damage the materials used in the anchor kit, it is strongly recommended to remove and store in a dry place when not in use for any extended period of time.

Environment Protection and Waste Protection and Electrical Equipment Regulations (W)

Recycle unwanted packaging materials. When this product is no longer required, or has reached the end of it's useful life, please dispose of it in an environmentally friendly way. Drain any fluids (if applicable) into approved containers, in accordance with local waste regulations. It is our policy to continually improve products and we reserve the right to alter data, specifications and parts without prior notice. No liability is accepted for incorrect use of this product. Guarantee is 12 months from purchase date, proof of which is required for any claim.
